

Our continuous qualitative growth is based upon the above-average competence of our team and the consequent use of the approved Ingenics method. To further upgrade our project team in Atlanta, we are looking for an:

› Automotive Methods Engineer

Your responsibilities:

- Deliver repeatable, long-term process and product quality solutions for new or changed products.
- Support pre-series builds of new models to help identify, analyze, and drive resolution of new model specific problems (dimensional).
- Analyze the scope of new designs by means of a systematic methods approach, with the goal being a repeatable, robust manufacturing process.
- Develop solutions to highly complex or unusual problems, which require regular use of ingenuity and innovation.
- Supports procurement, process engineering, and design engineering in the problem solving process with external suppliers.

Your profile:

- Above average technician or engineer qualification specializing in e.g. mechanical engineering or a comparable degree and professional experience, preferably in or for the automotive industry.
- Proven results in the planning and realization of complex projects.
- Interest in other cultures and the corresponding mobility to enthusiastically take new paths for our national and international customer projects.

Should you be interested, please send your complete application (including resume and cover letter) to Ms. Rebecca Adams, your contact person in Ulm, Germany.
