

Our continuous qualitative growth is based upon the above-average competence of our team and the consequent use of the approved Ingenics method. To further upgrade our office in Shanghai, China we are looking for a:

› Project Engineer - Factory Planning

Your responsibilities:

- Improving efficiency of manufacturing processes through competent planning and integration of customer requirements and Lean Production philosophies.
- The background knowledge enables you to structure complex tasks.
- The projects are primarily in the fields of design, planning and realisation of end-to-end concepts in manufacturing and assembly planning.
- You will participate in international project meetings via video conference and will communicate between the involved parties by interface management.

Your profile:

- You have an above-average Master in Mechanical Engineering or manufacturing technology and 5 years experience in the manufacturing industry.
- Excellent communication skills, including quick understanding and active listening, good team player.
- The ability to support our customers in complex project tasks as well as working in international project teams is your favourite task.
- Though our projects are most likely at Chinese locations, we expect flexibility and mobility within Asia.
- A good command of Chinese and either English or German is required, setting and observing time schedules and budget controlling are as essential as creating status reports.
- Willingness to take challenges, work under pressure, keep learning and self-improvement continuously.

Should you be interested, please send your complete application to Ms. Nici Zhong, your contact person in Shanghai, China.
