

Our continuous qualitative growth is based upon the above-average competence of our team and the consequent use of the approved Ingenics method. To further upgrade our office in Shanghai, China we are looking for a:

› Project Engineer - Supplier Development

Your responsibilities:

- Take part in international project teams and develop local suppliers of multinational OEMs.
- Ensure project milestones to guarantee SOP of OEMs' products.
- Design production processes of suppliers to match our customers' requirements regarding process stability and quality.
- Define testing methods and quality requirements.
- Establish continuous improvement processes.
- Train and coach suppliers in state-of-the-art methods and tools.

Your profile:

- You have Bachelor Degree in Industrial Engineering or preferably Vehicle Engineering.
- 5 years experience in the automotive manufacturing industry either in OEM manufacturer or 1st and 2nd tier supplier.
- Good practice with PPAP/APQP processes.
- Knowledge about ISO/TS16949, VDA 6.3. Auditing experience is preferred but not necessary.
- Good usage of problem solving and statistic analysis tools e.g. FMEA, 8D, SPC, etc.
- Knowledge of Lean Production methods is preferred e.g. 5S, VSM, KAIZEN, Six Sigma etc.
- Excellent communication and inter-cultural skills, including quick understanding and active listening, good team player.
- Though our projects are most likely at Chinese locations, we expect flexibility and mobility within Asia.
- A good command of Chinese and either fluent English or German is required.
- Willingness to take challenges, work under pressure, keep learning and continuous self-improvement.

Should you be interested, please send your complete application to Ms. Nici Zhong, your contact person in Shanghai, China.
